PROJECTS

1. Title	: Responsive Portfolio	Dec 2020
Project description	: Web Project on "E-Portfolio"	

A simple e-portfolio web app that highlights my knowledge on web development and examples of my work along with the usual resume information. This project is still under development with continuous updates, but is deployed under GitHub pages.

App-demo: <https://samarjeet-banik.netlify.app/>

2. Title	: Old Cars' Price Predictor	Oct 2021 - Nov 2021
Project description	: A Flask powered ML predictor app	

A price predictor model that predicts the price of your old car, based on some required input fields. The dataset for predicting the prices of cars are being taken from Qickr.com and Kaggle. The app is built using Flask framework for ML model deployment and hosted on Heroku.

App-demo: <https://old-cars-price-predictor.herokuapp.com/>

3. Title	: Generator-Noderplate	Jan 2022
Project description	: A NPM package - Boilerplate generator	

A NPM package powered by Yeoman that generates a scaffolding boilerplate for back-end workflow with Node.js. The boilerplate contains code files & folders, that are common in almost all Node.js projects. The package is deployed in global NPM registry and the scaffolding is handled via Yeoman.

Live API-demo: <https://www.npmjs.com/package/generator-noderplate/>
